

## スズの化学 Tin Chemistry

**Marcel Gielen**, Vrije Universiteit Brussels

**Alwyn G. Davies**, University College London

**Keith Pannell**, The University of Texas at El Paso

**Edward Tiekink**, The University of Texas at San Antonio

### 本書について:

広範囲への応用が可能なスズの化学は、現代科学において重要な位置を占め、世界各国で毎年新たに注目すべき研究成果が生み出されている。スズとその化合物の研究は、有機合成・医学・材料化学・触媒・環境といった観点から多大な関心を集めている。本書は、この重要な元素についての最新の知見を概観するもので、スズ研究の専門家・非専門家の両方にとって有益である。

### TABLE OF CONTENTS

#### 1. Introduction and overview

**2. Fundamentals in tin chemistry** 2.1 NMR of tin compounds 2.2 Sn(II) clusters 2.3 Monorganotin oxo-clusters  
2.4 Organotin carboxylate and -sulfonate clusters 2.5 Macrocyclic and supramolecular chemistry of organotin compounds  
2.6 Tin Zintl Ions: Synthesis, Structures, and Reactivity 2.7 Stable stannyl cations in condensed phase 2.8 Preparation and coordination chemistry of mono- and bidentate stannylenes 2.9 Stannenes, distannenes and stannynes 2.10 Distannoxanes  
2.11 Unusual bonds and coordination geometries 2.12 Tin(II) heterobimetallic and oligometallic derivatives  
2.13 Computational Methods for Organotin Compounds

**3. Materials Chemistry and Structural Chemistry of tin compounds** 3.1 Tin compounds for CVD 3.2 Class II Tin-Based Hybrid Materials Prepared From Alkynyltin Precursors 3.3 Organotin compounds as PVC stabilizers 3.4 Organotin compounds as anion-selective carriers in chemical sensors 3.5 Tin compounds as flame retardants and smoke suppressants. 3.6 Quadratic nonlinear optical properties in tin-based compounds 3.7 Tin-based hybrid materials 3.8 Organotin polymers and related materials 3.9 Intermolecular tin $\pi$ -aryl interactions: fact or artifact? A new bonding motif for supramolecular self-assembly in organotin compounds

**4. Medicinal/Biocidal Applications of tin compounds and Environmental Aspects** 4.1 The cardiovascular activity of organotin compounds 4.2 Organotins: Insecticidal and larvicidal activity 4.3 Antifungal activity of organotin compounds 4.4 Chemical and biotechnological developments in organotin cancer chemotherapy 4.5 Impact of organotin compounds on the function of human natural killer cells 4.6 Biological aspects of organotins: perspective in structural and molecular biology

**5. Tin in Organic Synthesis** 5.1 Applications of Organotin Derivatives for Carbohydrate Synthesis 5.2 Reactions of SE? Substitution for Organostannanes in Organic Synthesis 5.3 Organotin compounds for Carbon-Carbon Cross-Coupling  
5.4 Cross-Coupling of Organotin compounds for Carbon-Carbon Bond Formation: Applications in Total Synthesis 5.5 New Trends in the Synthesis of Solid-Supported Organotin Reagents and Interest of their Use in Organic Synthesis in a Concept of Green Chemistry 5.6 Palladium Catalysed Cascade Cyclisation-Anion Capture Processes Employing Pre- and In Situ-Formed Organostannanes 5.7 Carbostannylation of carbon-carbon unsaturated bonds 5.8 Green Organostannane Chemistry: an Oxymoron

**6. Tin in Catalysis** 6.1 Green organotin catalysts 6.2 Organotin catalysts for isocyanate reactions 6.3 Catalysis of reactions of allyltin compounds and organotin phenoxides by lithium perchlorate

出版:2008 年 8 月 ページ数(約):648 ISBN13:978-0-470-51771-0 価格:US\$240.00
