

[SCIENCE/Chemistry / Organic, Organometallic, Methods - Synthesis & Techniques]

現代表面有機金属化学 (全2巻)

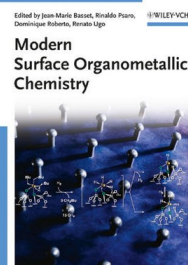

Modern Surface Organometallic Chemistry

Jean -Marie Basset, CPE-Lyon, Villeurbanne, France

Rinaldo Psaro, IMST-CNR, Milano, Italy

Dominique Roberto, Università degli Studi di Milano, Milano, Italy

Renato Ugo, Università degli Studi di Milano, Milano, Italy

本書について

表面有機金属化学の全般を幅広く網羅する本書は、急速な発展を遂げる表面化学の分野においてタイムリーな参考図書となる。第一部では基礎的側面が、また第二部では応用的側面が取り上げられる。

TABLE OF CONTENTS

FUNDAMENTAL SURFACE ORGANOMETALLIC CHEMISTRY

- The Genesis and Development of Surface Organometallic Chemistry
- Recent Development of Surface Organometallic Chemistry on Oxides and on Metals
- Structural Characterization of Surface Organometallic Species by Reaction and Spectroscopic Methods
- Heterogeneous Cr-based Polymerization Catalysts from Grafted Organometallic Precursors: Structure and Reactivity of the Active Sites Investigated by Means of Experimental and Theoretical Approaches
- Fundamental Aspects in the Surface Organometallic Chemistry of d(0) Metal Complexes
- Surface Organolanthanide and Actinide Chemistry
- Exploiting Surface Organometallic Chemistry to Prepare Metal Supported Catalysts by Fluidized Bed Metalorganic Chemical Vapor Deposition
- Carbonyl Compounds as Metallic Precursors of Tailored Supported Catalysts
- Ordered Supports for Organometallic Complexes
- Adsorption and Reactions of Organic Isocyanides on Metal Surfaces
- Molecular Insight for Silica-supported Organometallic Chemistry: Selected Examples of Silsesquioxane Derivatives
- Molecular Modelling of Surface Organometallic Chemistry

APPLIED SURFACE ORGANOMETALLIC CHEMISTRY

- Understanding and Enhancing Heterogeneous Catalysts Using Surface Organometallic Chemistry
- Surface Organometallic Chemistry for Selective Catalysis: Advanced Design of Catalyst Surfaces with Supported Metal Complexes
- Molecular Design of New Type of Catalysts Prepared via Tin Anchoring Technique. Multilayered Tin Organometallic Species Over Supported Metals
- Controlled Preparation of Heterogeneous Catalysts for Chemo, Stereo and Enantioselective Hydrogenation Reactions
- Organometallic Single Site Catalysts - from Homogeneous to Immobilised Systems
- Building Block Approaches to Single Site, Site Isolated Heterogeneous Catalysts
- Catalysis by Heterogeneous vs Homogeneous Late Transition Metal (Rh, Ir) Siloxide Complexes in Organosilicon Chemistry
- Organometallic Species to Nano Metals on Surface and Pores, their Chemistry and Catalysis
- Surface-mediated Organometallic Synthesis

出版: 2009年7月

ISBN13: 978-3-527-31972-5

ページ数(約): 750(全2巻)

価格: US\$310.00 (2009年10月現在/変動あり)
